

Kyaroline Suhana Rodrigues

+91 9611418332 kyarolinesuhanarodrigues@gmail.com LinkedIn GitHub

Professional Summary

Results-driven Information Science Engineering student with hands-on experience in full-stack development, machine learning, and data analysis. Proficient in building REST APIs, integrating authentication systems, and deploying production-ready applications. Strong foundation in data structures, problem-solving, and software development.

Education

National Institute of Engineering, Mysuru	CGPA: 8.16
B.E. in Information Science Engineering	Expected: Jun 2026
MMK & SDM Girls PU College	87%
Teresian Girls High School	97%

Technical Skills

Programming: Python, SQL, Java
Data Analysis: Data Cleaning, Data Visualization, Data Preprocessing, Statistical Analysis
Libraries: Pandas, NumPy, Matplotlib, Scikit-learn
Tools: Excel, Power BI, Tableau, Git, GitHub
Databases: MySQL, MongoDB
Concepts: Business Intelligence, Reporting, Dashboarding, REST APIs

Projects

VisualAid AI-Based Image Captioning System

- Developed an AI-powered web application to assist visually impaired users by converting images into descriptive audio output
- Implemented deep learning models for image captioning and OCR-based text extraction using PyTorch and Transformers
- Designed and integrated a Flask-based backend with real-time processing and audio generation

AI Chatbot Full Stack Application

- Built a full-stack chatbot application using FastAPI (backend) and React (frontend) with MongoDB for data storage
- Implemented user authentication, session management, and chat history persistence
- Utilized REST APIs and React Hooks for efficient state management and dynamic UI updates

ReviewAI AI-Powered SaaS Platform

- Developed a scalable SaaS platform for automated business review management and SEO insights
- Integrated Google OAuth authentication and Razorpay payment gateway for subscription management
- Built backend services using Node.js and deployed the application with production-ready architecture

Sales Data Analysis Dashboard

- Analyzed sales datasets using Excel, SQL, and Python to identify revenue trends and customer behavior
- Performed data cleaning, preprocessing, and visualization using Pandas and Matplotlib
- Created interactive dashboards and reports for business insights and performance tracking
- Improved decision-making by identifying high-performing products and monthly sales patterns

Certifications

- Cryptography & Programming with Crypto API University of Colorado (Coursera)
- Blockchain in Financial Services INSEAD (Coursera)
- HTML, CSS, and JavaScript Johns Hopkins University (Coursera)
